

# Laboratory tests for bio-based coatings additives

Use our laboratory capacity to optimise your formulation. Our supply partner Addapt Chemicals BV offers a wide range of sustainable additives for the CASE and lubricant industry.

In addition to outstanding performance, the products score with a high proportion of bio-based raw materials, which are also label-free and VOC-free. FDA grades and customised product developments are also available.

## Advantages:

- Innovative high performance additives
- Bio-based and sustainable
- Label-free, VOC-free, FDA grades available
- Tailor-made product development

## Extract from the bio-based portfolio of:

- (Co)-dispersants and neutralizing agents - CODIS & ADDISP
- Defoamers - Foamstop
- Corrosion inhibitors - Anticor
- Wetting and levelling agents - BioWet
- Stabilised silicate solutions - SilStab

### Lab tests

Send us your basic formulation and we will optimise your system.

## Laboratory

R&D, analytics and application laboratory as well as modern equipment for various tests:

- Weathering test (UV, sunlight, humidity, rain).
- Condensation chamber
- Salt spray tests
- Abrasion resistance (wet/dry)
